

Stephen Smith

Summary

My music generally draws from multiple production manifestations. As I am inherently curious about as many kinds of music as I can engage, I am able to attribute many musical influences into everything I do. This approach infuses a vast amount of color to my projects which often fall somewhere between the musical sensibilities of two of my favorite composers: Hans Zimmer and Gabriel Yared. As someone who once managed regional communications for a large defense contractor, I pride myself on my ability to bring a unique professionalism to my process.

Work History

2015 – Present

JMUSIC - Founder and Lead Composer
